### Polyiso Insulation Price Increase

### Effective October 1st, 2014

**Visit Atlas At These Social Media Sites:**

**To: Valued Customers and Atlas Representatives**

Raw material increases continue to be received from our suppliers for several of the chemicals used in the production of polyiso insulation(s).

In addition, there have been significant increases in freight costs, even though the availability of trucking has been drastically reduced.

The combination of the two issues referenced above, continues to erode margins while increasing the overall cost of production.

To offset these combined cost increases, Atlas is announcing a 5% increase in pricing for all polyiso products, effective October 1st, 2014.

Thank you for your support.

Sincerely,  
Commercial Products Group  
Atlas Roofing Corporation
